niflink

We simplify the flow of data, enhancing
The Human Experience

Niflink uses lossless compression to shrink your video, audio and document files (containing images) for faster transmission and buffer-free streaming that doesn't compromise on quality.

Turn your data stream
into a digital ocean

Niflink is building the future of human-to-machine and machine-to-machine communication.

niflink
Tech

TechnologythatLinksPeople Together

We transform your existing data infrastructure by optimising digital communications so that they reach everyone, everywhere regardless of bandwidth.

niflink

Teach

Educationfora digital world

We connect academic institutions with their digital future, helping themdevelopefficientandcreative pathways that improve learning outcomes.

niflink
Telemed

MedicalSystemsthat Advance Health
We create innovative healthcare systems for organisations that work toimproveandadvancepatientcare in technologically underdeveloped areas.

Reduce File Size.
Maintain Media Quality.

Our NIF compression framework enhances the user experience for media files, as files can be transmitted on low bandwidth connections.

Large media files can be compressed up to 90% of their original size! This means that you don't have to spend more on storage while increasing your capacity to serve a larger audience. The technology enables live-streaming to almost anywhere, even when bandwidth is as low as 384 Kbps!

Niflink's framework optimises the flow of media between software and hardware devices – linking communities to critical information.

Media files compression
Get data compression of

up to 90%.

A 1.6 GB HD video can be compressed to 70MB.

Streaming & Video Conferencing
Host remarkable live or in-person broadcasts everyone can watch. No lagging or keeping people waiting... you can stream HD video at

348Kbps.

Images In Documents

NifTech compresses images in documents and converts the documents to PDF for efficient dissemination.

OUR LEGACY

For the past 22 years Niflink has been pioneering solutions in Teleradiology and Telemedicine - Working with industry leaders around the world to help them integrate our communications systems into their companies.

SENTECH *connecting You*   vodacom   MILLENSYS   MTN

We have successfully implemented eLearning solutions at schools through partnerships with Vodacom and MTN.

End-to-end e-learning solutions

We supply the hardware and software to run your eLearning program.

We plan and implement the solution to your exact requirements.

We install the software for complete learner management & content delivery.

Improve Operational Efficiency
Improve Business Performance
